

## **1.2.2 Dr. Cathy Marks Krpan E Learning Session for 2017 participants of Math Beyond Rules, Procedures and Routines**

### **Instructions:**

**Dr. Cathy Marks Krpan has developed an audio PowerPoint for your use between now and May 10, 2017.**

**Intent:** to support teacher teams in planning to use math thinking strategies in your instruction.

### **Task:**

1. Set dates and times, between now and May 10, to plan a lesson, teach it and reflect on how the lesson went. Capture what you observed about students' strengths, needs and next steps.
2. The Power Point is a little more than 15 minutes long.  
Instructions on how to navigate through the Power Point are provided on slide 2.  
Cathy has provided a lot to think about and to discuss. You may want to spend the first meeting watching the whole Power Point and then as a team discuss how to chunk it into manageable pieces and then determine how many future team meetings you'll need.
3. Bring a math question you want to build a think aloud strategy around and bring it to the meeting.
4. Come to the May 16 mRLC session with Dr. Marks Krpan, prepared to talk about your learning.
